IFSEC 2016

Mitsubishi Electric returns to IFSEC for 2016 with an impressive line-up of videowall display systems, designed to deliver total reliability in mission-critical control room applications.

Mitsubishi's expertise ranges from security and utilities management, public transport networks, telecommunications, aerospace, factory automation and government facilities. Over 71,000 Mitsubishi Electric displays have been installed worldwide to date, enabling operators to keep "eyes-on" in applications ranging from small crisis suites to vast control rooms.

At IFSEC 2016 Mitsubishi Electric will showcase just a small selection of its extensive product portfolio of videowall displays. The 60" 60HS12 "Slim cube" provides a high-end, yet cost-effective DLP™ display solution for compact control rooms. Occupying 40% less space than a conventional DLP system, the 60HS12 delivers 50,000 hours of continuous, 24/7 operation and is completely maintenance free. The 60HS12 is just one of the DLP systems available from Mitsubishi Electric. Its 120 Series and Seventy Series range of high-end DLP displays feature an impressive specification list and incredible lifespans of over 11 years of maintenance-free, continuous 24/7 operation.

For less demanding applications, LCD is a good choice, and here too Mitsubishi Electric leads the market with fully-featured yet compact videowalls than can be installed virtually anywhere. On show at IFSEC 2016 will be the latest 55" LCD display, the LM55P2. Featuring an ultra narrow bezel of just 3mm, the LM55P2 offers a wealth of features including built-in processing that enables sophisticated multi-window videowalls to be created with no external processing required.

Completing the stand, a customised Insight Prestige control room console from Winsted, who are exhibiting on the adjoining stand D1565, where they will have a 4 x 2 videowall installed on their M-View monitor stand, using Mitsubishi's LM55P1 SNB LCD monitors.

Mitsubishi Electric can be found on stand D1560 at IFEC 2016. For more information, visit the IFSEC Global Directory at www.ifsec.co.uk or go to www.mitsubishielectric-displaysolutions.com
